

Thermal Printers

If you don't need colour labels why not consider a thermal transfer printer? For speed and economical running costs they can't be beaten.

Toshiba TEC B-SA4

The Toshiba TEC B-SA4 is the most popular thermal printer we sell. It is available with 203dpi or 300dpi print heads and with a plastic or industrial metal outer casing. It prints at speeds of up to 6" per second and has a USB port as standard for easy connectivity.

The B-SA4 print head is 4" wide so it can print stick-in labels up to 115x25mm wide edge leading. Self-tie labels are rolled narrow edge leading either 3 or 4 labels across. It can also print a wide range of self-adhesive labels up to 100x150mm in size. All print is incredibly durable and will last at least a year in normal outdoor conditions.

TXP-SX5

The TXP-SX5 thermal transfer printer is a high end printer which can print thicker stick-in labels than the B-SA4. It can also take 9" wide self-tie labels wide edge leading with a print width of 5" making it extremely versatile. It can also print a huge variety of different sizes of self-adhesive labels. The TXP-SX5 prints at speeds of up to 8" per second at 300dpi quality and comes in a rugged powder coated steel case.

Consumables

As well as the printers themselves we can supply all of your print foils and thermal labels. Contact us for available sizes and prices.
